

2-In-1 Wireless & Wired Barcode Scanner

This is a plug & play wireless barcode scanner that can read 1D linear bar codes.

Thank you for choosing our new barcode r PDA Series Wireless Bar Code Collector. It is combined with wireless barcode scanner and various commonly used wireless barcode data acquisition functions.

4-in-1

- Wireless 1D Barcode Scanner – Read 1D barcode: UPC, EAN, Code128, Code39, ITF25, Codebar, Code93, MSI etc. Move freely via a wireless adapter without any obstacles.
- USB 1D Barcode Scanner – Send barcode to PC via USB Cable in real-time. Both USB and wireless can send data to PC.
- Inventory Scanner – Receive barcode and counts the quantity. Manual input or auto add.
- Barcode Collector – Store up to 300,000 barcodes. Collect export and inventory export easily.

NOTE:

Data collect mode is non-real-time transmission mode, all the barcode acquisition after mass transfer, the user can choose to export wireless or cable. All scanned barcodes are stored in FLASH memory in scan order, and power loss does not result in data loss.

Long Transmission Range

- The transmission distance in barrier free environment can reach up to 100 m / 328 ft.
- The transmission distance in obstacles environment is less than 50 m / 164 ft.
- The transmission distance decreases as obstacles increase.

The scanner supports a wide range of barcode types including: UPC/EAN, UPC/EAN with Supplemental, UCC/EAN 128, Code 39, Code 39 Full ASCII, Trioptic Code 39, Code 128, Code 128 Full ASCII, Codabar, Interleaved 2 of 5, Discrete 2 of 5, Code 93, MSI, Code 11, RSS variants, Chinese 2 of 5.

Attention:

Can't read any type 2D barcode

Can't read any barcode from Screen
