

CPT8000 software

1. Install the CPT driver on #4 BEFORE connecting the USB scanner.
2. Create a new folder c:\program files\easyforyou\cpt-driver
3. Copy from your (cd-ROM)

E:\CPT_Tools\Cradles\USB Cradle\308 USB Driver*.*

or

E:\CPT_Tools\USB Cradle\308 USB*.*

to c:\program files\easyforyou\cpt-driver

4. Start c:\program files\easyforyou\cpt-driver\

CP210x_VCP_Win2K_XP_S2K3.exe

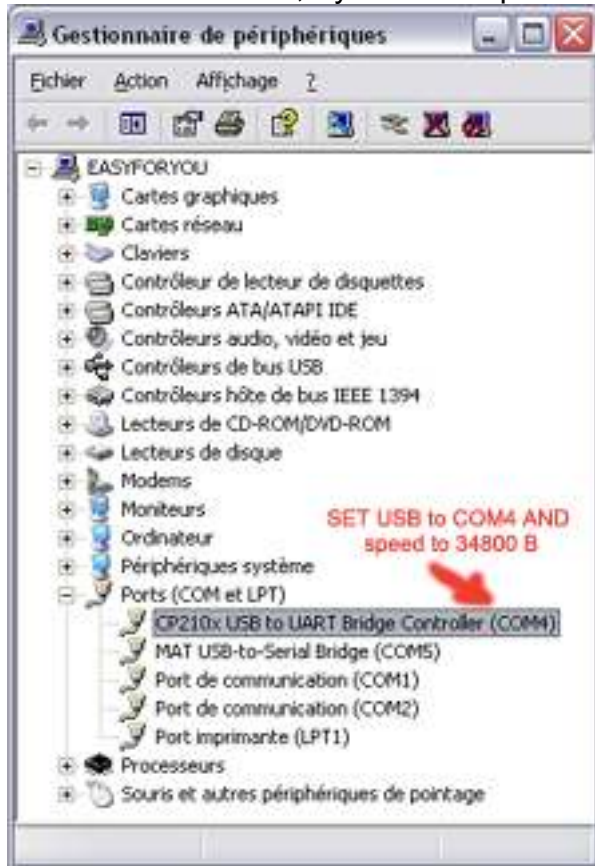

or

PreInstaller.exe

Connect your scanner to USB port.

5. Select 34800 b for the all the speeds.
(also inside the scanner menu utilities – Settings)

6. If no communication, try to set the parameters of the USB cpt210x to COM4

7. Create a new folder c:\program files\easyforyou\cpt-Utilities
8. Copy from your (cd-ROM) E:\CPT_Tools\Utilities\AG Utilities*. * to c:\program files\easyforyou\cpt-Utilities
9. Copy from your (cd-ROM) E:\CPT_Tools\80x0\Application Generator (Batch)*. * to c:\program files\easyforyou\cpt-Utilities*. * to c:\program files\easyforyou\cpt-Utilities

In c:\program files\easyforyou\cpt-Utilities :

10. use ... \Utilities\AG8000N.exe (or AG8000N-437.exe) To download (or generate) applications inside CPT8000.
(default application for Easy-For-You: c:\program files\easyforyou\cpt-8000.AGX and cpt-8000-NS.AGX)
cpt-8000-NS.AGX = No stop at quantities
11. c:\program files\easyforyou\ExportToCsv.exe to export your products to a text file c:\program files\easyforyou\export\art001.txt
12. Dlookup.exe to download your products from c:\program files\easyforyou\export\art001.txt inside CPT8000 (Lookup.ini for the path parameter)
To connect the scanner, in the scanner select Utilities->Load Files
13. Try now to Scan your Customers and products.

14. IR_Read.exe to upload the result of your scan in the computer
15. Use IR_Read.ini for the path parameter.
16. Example for the file name include the destination Ledger (BC1-ORDER, FT1 Invoice...) C:\Program Files\Easy For You\import\CPT8000-BC1.txt inside IR_Read.ini

Note 1 : If you do not specify the destination ledger, the document is imported in the current ledger (active document TAB)
(for example CPT8000.txg)

Note 2 : If you like to regroup the quantity by product, take .TXG as extension for the file
(for example CPT8000.txg or CPT8000-BC1.txt)

17. to import CPT8000.txt inside EasyForYou, start EasyForYou (select the document TAB) and press **Shift-F2**.
18. In case of inventory, if you like to reset the stock quantities, before you press Shift-F2, create a supplier with code 'RESETSTOCK' and select this supplier in the document or scan this customer code in your file cpt8000.txt
So if you select this supplier code the quantities that you scan are not added to the stock quantities but they are the definitely quantities.
After input with Shift-F2, if you like, in the document you can change the supplier code 'RESETSTOCK' with another supplier code.
